license
(B)

Studies

- Matriculation from Lyceum Classicum Tampere
- Studied computer sciences from 2006-2009 in the Technical University of Tampere
- Now studying digital signal processing and communication technology in the same place as earlier (2009 - ?)

Work

- **I've spent 2 weeks as an intern at Domus Offset, Tampere as part of the secondary school's program.**

Did some paper waffling, Excel and a whole load of other computerized office work.

- **I've designed and administrated a site for BG Associates in 2004**

Built the whole site, including the graphics design and inputting the content. Used Drupal as a framework for the site, Notepad++ for creating some bits and bites of it and Photoshop Elements for the initial layout design.

- **I have also written and continue to write news and reviews to a site called eDome (<http://edome.fi>).**

I have done various game reviews, previews and news all related to the game industry. My writing has vastly improved because of this.

- **Helped organize a tournament in the 2007 Assembly Winter**

Organized the Quake 4 tournament as well as upholding the rules there.

Other information

My main interests are languages, literature and all kinds of interactive entertainment. Due to my interests, I also like to write a lot. Programs, reviews, stories, you name it. So long as someone's interested. As far as physical sports go, I like judo and biking a lot.
